

## Vigil Statement in Regard of the New Vigil Double Pin Cutter Full Stainless Steel

Dear customers:

Regarding the recent tests carried out by Strong Enterprises in the US with the new vigil double pin cutter which didn't perform correctly.

This only affects the full Stainless Steel Double Cutter of which only 30 pieces were produced. All 30 Vigil Dual Cutters in this batch have been accounted for.

The Double Pin Cutter with plastic insert and all single cutters on the market are not affected and are safe to jump.

We apologize for the inconvenience but our first aim is your safety and we want to thank Strong Enterprises for their immediate action and assistance in highlighting this problem.

Double Cutters with new spot charge will be available in 3 weeks. We have implemented new test procedures that will eliminate the possibility of this happening in the future.

We thank you for your confidence and comprehension. Best regards  
Vigil Team.
